

The footprint of Scotland's universities

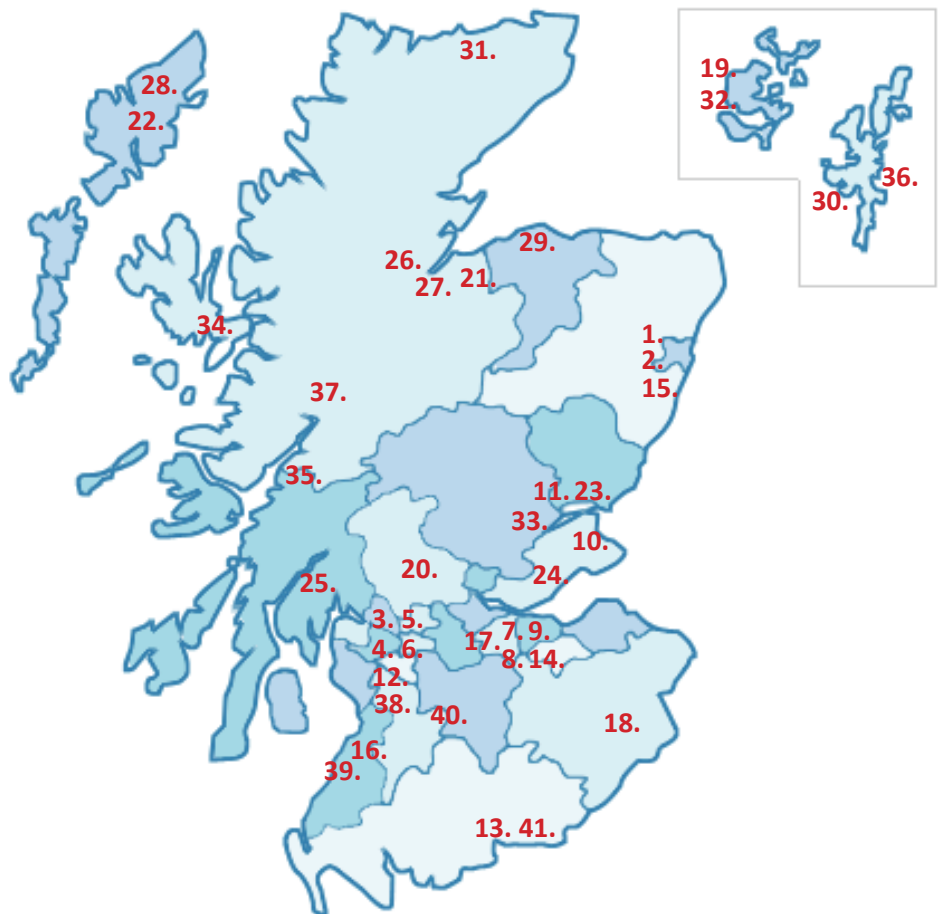

Scotland's 19 universities are located throughout the country.

Scotland's university footprint can be found not only in every one of Scotland's seven cities, but far beyond into Scotland's remote and rural communities.

All of Scotland's universities have important local, regional, national and international roles to play.

Scotland is also home to the Open University in Scotland; a world leader in modern distance learning.

As well as reaching into every corner of Scotland, universities have links to partners on every continent, and so help to bring the rest of the world closer to Scotland.

Scotland's HEIs

The Open University in Scotland

1. Robert Gordon University
2. University of Aberdeen
3. University of Strathclyde
4. Glasgow Caledonian University
